

## View Trees for a new user

The screenshot shows a dark green header bar with a small tree icon on the left. To the right are three menu items: "My Account", "My Trees", and "About Us". On the far right of the header are a search bar containing "Search For Tree" with a magnifying glass icon, a "User's name" input field, and a "Logout" link. Below the header, the main content area has a light beige background. It features a heading "Create a Tree" followed by a sub-heading "Choose a Tree Name". There is a text input field labeled "TreeName" and a green "Submit" button. A horizontal line separates this section from the next.

Shared Trees

It's looking a bit empty :(

## My Trees with one tree

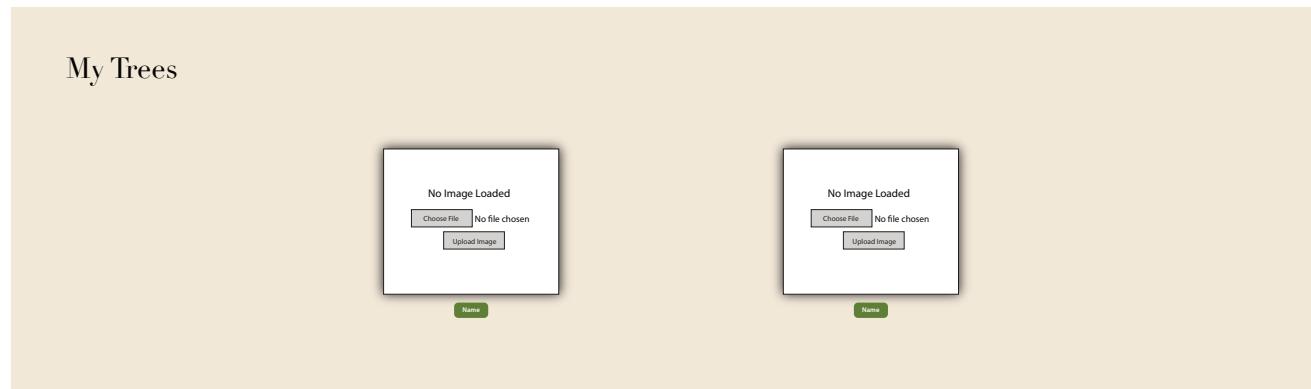

The screenshot shows the same dark green header and "My Trees" page structure as the first one. The main content area now displays a single tree entry. It consists of a white rectangular box with rounded corners. Inside the box, the text "No Image Loaded" is centered at the top. Below it are two buttons: "Choose File" and "No file chosen", followed by a "Upload Image" button. At the bottom of the box is a small green "Name" button. The rest of the page is empty.

My Trees

No Image Loaded

## My Trees with two trees

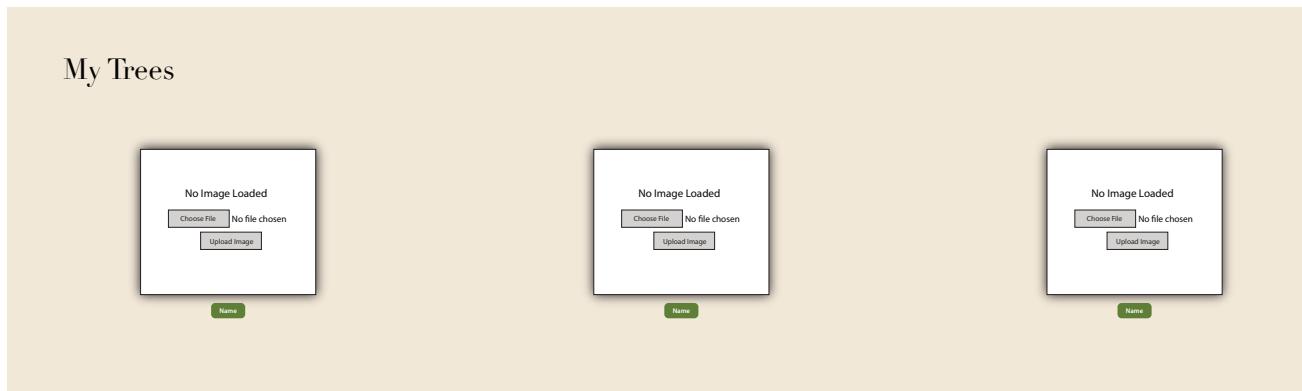

The screenshot shows the same dark green header and "My Trees" page structure. The main content area now displays two separate tree entries, each in its own white rectangular box. Each entry follows the same pattern: "No Image Loaded" at the top, followed by "Choose File", "No file chosen", and "Upload Image" buttons, and a "Name" button at the bottom. The rest of the page is empty.

## Our Mission

The Family Thread is a system software that family members can use to create a family tree. Unlike other family tree products, ours allows users to add custom portraits, and work with other collaborators to create a more accurate representation while being user-friendly and visually appealing.

## Our Vision

For genealogists or adults who might be interested in their lineage or their family's represented as a visualization. The Family Thread is an interactive family tree that allows family members to create a family tree, add custom portraits, and work with other collaborators to create a more accurate representation while being user-friendly and visually appealing. Unlike Family Echo, our product provides more creative flexibility and allows the family tree to be pleasing to the eye.
